Ms. Bonnie Eleder  
Illinois Environmental Protection Agency  
1701 s. First Street  
Maywood, Illinois 60153

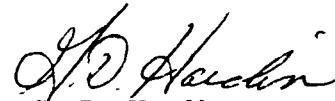

Dear Ms. Eleder:

This is to advise your office that Cosden Oil and Chemical Company at Calumet City, Illinois has complied with the Closure Plan Requirement, as set forth in 40 CFR 265.112 and 40 CFR 265.73(F).

I have enclosed a copy of the Closure Plan that should be inserted in the RCFA Training Manual provided you on March 26, 1982.

Thank you.

Sincerely yours,

  
G. D. Hardin,  
Office Manager

Appendix C

CALUMET CITY CLOSURE PLAN

ILL. E.P.A. - D.L.P.C.  
STATE OF ILLINOIS

DRUM STORAGE SITE A:

In the event of plant closure, this area will be void of any hazardous waste.

All drums will be properly labeled and shipped for disposal to a permitted off-site facility.

The concrete slab will be thoroughly cleaned with contaminants placed in DOT approved drums for shipment to an approved off-site facility.

The possibility of any ground water contamination adjacent to this area is remote as the slab is secured by a six inch concrete dyke with proper drainage to a sump contained within the storage area.

MAXIMUM DRUM STORAGE:

Cosden does not anticipate storage of more than ninety (90) drums of hazardous waste.

FINAL CLOSURE:

Cosden will generate hazardous waste as long as the continuous process unit is in operation. There are no plans in the future to discontinue this operation, therefore, an estimated closure date is not available.

CLOSURE COST:

Closure cost should be minimal for this area with total cost not exceeding \$2,000.00.
